

PRAIRIE MOUNTAIN PET RESORT POST-CARE

Your pet may or may not experience minor problems after leaving our hotel. The typical complications are usually self-limiting within 3-5 days after returning home, at which time your pet should return to normal. (This sheet is the property of Prairie Mountain Pet Resort.) If any conditions persist, consult a veterinarian.

<u>Problems</u>	<u>Possible Causes</u>	<u>PMPR Solutions</u>
Diarrhea	Elevated anxiety Diet change Separation stress Heat (weather)	Remove food for 24 hours, then feed rice until stool returns to normal.
Coughing Sneezing	Barking Cold Virus	Keep pet calm and quiet if possible by minimizing stimulating activities.
Laryngitis	Barking	Keep pet calm and quiet if possible by minimizing stimulating activities.
Body Odour	Diarrhea Elevated anxiety Panting, pacing, playing Exercise	We offer a departure service for a reasonable fee.
Hair Loss/Callouses	Pressure from laying on Elbows or paws	Rest and bedding/padding at home.
Lethargic (Tired)	Stimulating environment Day time naps reduction Barking, playing, panting, Jumping, exercise	Rest at home.
Weight Loss	Separation anxiety Routine disruption fasting Increased exercise Fewer treats and snacks	Resume normal food rations. Reduce exercise if necessary.
Weight Gain	Consuming more food, Than normally grazed Muscle gain from exercise	Resume normal food rations, And/or add more exercise.
Dehydration	Panting, barking, Pacing, playing, exercise	100 Lb. dog requires 3 quarts water 48 kg. = 3 litres on a daily basis (minimum) 1 oz. per Lb. body weight for cats 29 ml. per ½ Kg. (approximately)

- * Not all coughs are canine cough.
- * Animals can instinctively hide illness until it's serious.
- * A pet hotel/resort is a stimulating environment (play time, treat time, meal time, arrivals, departures, and occasional meet and greets).
Pets may exhibit different behaviour than at home, such as destroying their bedding or barking excessively.
- * Anxious pets can experience a compromised immune system, resulting in complications and/or illnesses.

This is not a complete list of issues, but if you have any concerns, please call us @ 306.384.8390 or your veterinarian.
